Sujay Kulkarni

Technical Account Manager

I'm from Karnataka, India. I completed my B.Tech in Electronics and Communication in Bangalore and worked as a Software Engineer before I decided to pursue MBA. I moved to Canada to study MBA from McMaster University and I graduated from the full time MBA program in 2021. As part of the program, I did internships at CIBC as an MBA intern and Appficiency as Strategic Business Consultant. Currently, I'm working as a Technical Account Manager at Google Cloud and as part of my role, I work with large Enterprise customers in Canada, handling their Google Cloud journey and ensuring a positive customer experience with Google. In my free time, I love to go on treks and road-trips. Recently, I went to some exciting treks in Tobermory, Quebec City and California to name a few. I also like to play various sports such as Basketball, badminton and cricket.

Aurélie Ye

Apprentice Product Manager

Hey! I'm Aurélie, an Apprentice Product Manager at Shopify working on making the Shop app the best way to shop from your phone. I studied business at McGill, specifically in retail management and computer science. Through multiple case competitions, hackathons, internships, and spearheading projects in a non-profit, I discovered my passion for tech, entrepreneurship and strategy. Ultimately, these combined experiences led me to build a community of aspiring product managers called The Product Project.

Jessica Sung

Product Manager

Transitioning from CPG to retail to tech, Jess Sung brings a diverse background and skillset to her product management approach. Her background in customer analytics, working with content creators, and personal design projects helped lead her to her current role as a product manager with the community experience org at Twitch, helping match viewers to content on the live-streaming platform.

Previously, she was an associate product manager for one of Canada's most beloved brands, Mountain Equipment Company, helping more Canadians get outdoors via MEC.ca. In her spare time, Jess is an avid tabletop gamer and works with content creators in the streaming space to develop their personal brand and stream assets.

Patrick Vuong

Product Marketing Manager

Patrick is a Microsoft Product Marketing Manager within the Digital Application & Innovation team focused on empowering developers to build apps of the future on Azure. Patrick went to school at McMaster University and then began his career in tech at Microsoft Canada before moving to Seattle for his current role. In Canada Patrick has been recognized with 6 Canadian Marketing Awards on his work with winning the hearts and minds of developers with Microsoft Azure by creating advocates. Patrick has helped companies discover, explore, skill and adopt technology to be a part of innovative solutions. He is passionate about empowering industries, customers, and individuals on leveraging tech to drive digital transformation and making the art of the possible a reality.
